

VENTOFR  
new formula

BREATHE RESPONSIBLY

TENDITALIA  
*i feel at home*

The quality of our environment is fundamentally important for our health and well-being, we unknowingly breathe harmful contaminants in the air every day, including **FORMALDEHYDE**: a carcinogenic chemical compound dispersed in gaseous form.

This substance is given off by many products and items inside our homes and workplaces, including furniture, carpets, curtains, synthetic flooring etc. ...

Tenditalia has always been aware of and has paid considerable attention to these problems, creating **FORMALDEHYDE-FREE** fabrics and, with commitment and experience, it has now developed a new **TESTED** and **CERTIFIED** product, which is unique worldwide: **VentoFR NewFormula** permanently captures **FORMALDEHYDE** without any energy consumption.

VentoFr NewFormula, developed from Formaldehyde **FREE**, is a curtain fabric capable of breaking up and eliminating this contaminant in a long-lasting manner without the need for any kind of device to be turned on or off.

SUITABLE FOR:

OFFICES  
SCHOOLS  
NURSERY  
HOTELS  
HOMES

### BREATHE RESPONSIBLY

“The quality of our life depends on our **COMMITMENT** to make it better”

#### VentoFR NewFormula:

- is formulated to help purify the air by acting on the environment and on our well-being;
- it is resistant to mould and bacteria, and particularly suitable for rooms with high levels of humidity thanks to special **Hygienguard®** treatment;
- it is completely customizable with regards to colours and printing.

Once again **TENDITALIA** confirms its commitment to creating high-performance products, capable of combining **COMFORT** and **WELLBEING** in a single fabric.
